

# Table of Contents

<b>Introduction .....</b>	<b>1</b>
<b>Realistic expectations .....</b>	<b>2</b>
<b>Section 1: How we view our universe.....</b>	<b>5</b>
Rotation of the earth .....	9
Celestial coordinate system.....	12
Movement of the sun, moon and planets.....	16
Asteroids, comets, meteors and other moving objects .....	18
Light pollution and your ability to see .....	20
<b>Section 2: Equipment.....</b>	<b>27</b>
Binoculars .....	30
Porro prism and roof prism .....	31
Aperture and magnification .....	32
Image stabilization.....	34
Other features .....	35
Binocular mounts .....	37
Telescopes .....	38
Refractors .....	39
Newtonians.....	42
Dobsonians .....	44
Compound telescopes .....	46
Which telescope is right for you?.....	48
Accessories .....	52
Eyepieces.....	53
Barlows .....	59
Diagonals .....	60
Focusers.....	62
Filters .....	64
Finders .....	66
Mounts.....	69

Altitude azimuth.....	70
Equatorial .....	73
Manual, tracking, push-to and go-to .....	78
Setting up .....	80
Equatorial setup and balance .....	81
Collimation .....	93
Finder alignment .....	99
Polar alignment.....	101
Computer alignment.....	109
Why are things upside down?.....	112
Charts & software .....	113
Catalogs.....	114
Reading star maps.....	115
Paper charts .....	119
Planispheres .....	121
Software .....	122
Stellarium .....	123
C2A .....	128
TheSkyX.....	139
Astroplanner .....	144
Other computer software .....	149
Tablet and smartphone software .....	152
Miscellaneous other equipment.....	158
Flashlights .....	159
Chairs and tables.....	160
Dew prevention devices.....	162
Cold weather gear .....	164
Providing power .....	165
Sundry items .....	167
<b>Section 3: Observing .....</b>	<b>169</b>

Important observers of the past.....	172
Aristotle .....	173
Claudius Ptolemy .....	175
Tycho Brahe .....	177
Johannes Kepler.....	179
Galileo Galilei .....	181
Charles Messier .....	183
William Herschel.....	185
Percival Lowell .....	187
Carl Sagan .....	189
Sir Patrick Moore .....	191
Picking an observing location .....	193
The best times for observing .....	195
Dark vision: adapting to the dark .....	197
Averted vision and tapping.....	198
Etiquette for observing with others .....	199
Organizations, clubs and star parties .....	200
What to observe .....	202
The moon.....	203
The sun .....	206
Stars .....	208
Planets .....	210
Deep space objects.....	212
Meteor showers .....	214
Solar eclipses .....	216
Lunar eclipses .....	218
Transits .....	220
Novae/supernovae .....	222
Conjunctions .....	223
Iridium flares.....	225

Recording your observations .....	226
Estimating magnitudes.....	230
<b>Observation charts and objects to view .....</b>	<b>235</b>
<b>Math is your friend .....</b>	<b>257</b>
<b>Where to get more information .....</b>	<b>258</b>
<b>Glossary.....</b>	<b>262</b>
<b>Index .....</b>	<b>275</b>
